Highlights of Kamchatka - Bears and Volcanoes

KK-06

This truly unique tour for wild life and nature lovers will take place only once a year - in August, the best time to observe so many natural species in one place. You will travel to Kurilskoye Lake situated in the crater of an ancient volcano. The lake is recognized as the biggest spawning-ground for salmon in the world, and you will see the massive pink salmon swimming, as well as amazing scenes of bears fishing. As well as all this, the numerous active volcanoes and geysers are of course essential points in our tour. Indulge yourself by bathing in a hot thermal spring, walk within the crater of an active volcano, and enjoy the breathtaking view of Kamchatka from the helicopter on your way to the famous valley of the geysers!
